

# 1" High Flow Auto Shut-Off Nozzle

The 1" High Flow Auto Shut-Off Nozzle is a high quality, heavy duty automatic petrol and diesel nozzle approved for refuelling in resale pumping applications.

ZVA nozzle automatically shuts off to prevent fuel from spilling out.

Designed for applications where high volumes of diesel or petrol need to be dispensed at a time.

ZVA nozzles, are a widely recognised brand of forecourt (retail) style models, known for their careful and quality design and sturdy manufacturing.

ZVA nozzles, as seen on the forecourt, are high-end fuel nozzles approved for resale dispensing rather than just private applications. ZVA is a brand well recognised within the commercial refuelling sector.

There are a number of models available in the ZVA nozzle range including automatic shut-off nozzles for diesel, petrol and AdBlue, and manual nozzles for both diesel and chemicals.

Depending upon your application, there is also the choice of high speed petrol and diesel nozzles, as well as a ZVA nozzle range designed specifically for gravity fed systems.
