 Mounting connection:BSP
 Pressure settings:8oz/in²
 Cover:brass

Seat material:Viton A
 Body material:brass
 Overall Diameter:3"
 Height:2.96"
 Weight:1.0

Specification options

The emergency vent (pressure relief only) used on aboveground storage tanks, as a code requirement, to help prevent the tank from becoming over-pressurized and possibly rupturing if ever exposed to fire. The vent must be used in conjunction with a "normal vent." Correct application of this vent requires proper vent size and selection for the tank system in order to meet the specific venting capacity.
